

Re-imagine the way you work

ABOUT PODOBLOCK

About us

Who we are

Podoblock is the global leader in accessories and tools for the imaging market. We develop smart, durable and ergonomic tools for veterinary and human imaging professionals.

Since 2008, we have pioneered solutions that make mobile and clinical imaging safer and more efficient, supporting professionals worldwide.

Re-imagine the way you work.

Our history

Founded in the Netherlands, Podoblock began as a specialist in equine imaging and has grown into a global provider for multiple markets.

With nearly three decades of field experience and strong engineering expertise, we continue to push the boundaries of practical innovation.

What drives us

We improve every product we make. Refining, redesigning and optimising to meet the real demands of daily imaging work. Our focus: better ergonomics, higher safety and smarter mobility.

Made in Holland

All Podoblock products are made in the Netherlands using only high-quality materials.

Supporting worldwide

Through warehouses in the Netherlands and Florida (USA), we deliver globally and provide service that ensures long-lasting performance.

What we stand for

Craftsmanship

We combine decades of experience with Dutch craftsmanship. Every product is designed, engineered and tested with precision, built to last and to support professionals in real working conditions.

Innovation

Since our start in 2008, we have pioneered mobile imaging solutions. We innovate continuously, making every new solution smarter, safer and more efficient than the last, guided by feedback from professionals worldwide.

Efficiency

Efficiency is crucial in a fast-paced profession. Our solutions reduce physical strain, streamline workflows and enhance mobility, helping practitioners focus on delivering high-quality imaging and patient care.

We will continue to develop products that enable imaging professionals to work safely and efficiently every day.

How we work

1. We listen

We work closely with veterinarians and imaging specialists. Their real-world challenges shape the products we create.

2. We design

Our engineers translate these insights into ergonomic, durable and mobile solutions, built for demanding field and clinical environments.

3. We test

Each product is rigorously tested to ensure stability, usability and long-term reliability.

4. We refine

Innovation never stops. We continuously improve our tools to make them smarter, safer and easier to work with.

5. We support

From production to delivery and aftercare, we provide service and guidance to ensure professionals can rely on their equipment every day.

Markets we serve

Equine veterinarians

Podoblock supports both ambulatory equine vets and specialized clinics with tools that make imaging safer, faster and more efficient. Our mobile solutions help practitioners work ergonomically in any environment, from fieldwork to clinical settings.

Small animal practices

We provide smart tools that support animal positioning, improve workflow efficiency, and enhance ergonomic working conditions. Our first fully original small-animal innovation, the internal Small Animal Transport, allows practitioners to lift and move even large dogs safely and with minimal physical strain.

Human healthcare

As human imaging becomes increasingly mobile, Podoblock offers tools that support safe and efficient ambulatory workflows. We supply Stat-X generator stands to hospitals and provide custom-designed protective apparel, including friendly designs used in pediatric departments.

Worldwide delivery

Through our warehouses in the Netherlands and Florida, USA, we deliver worldwide. With monthly shipments between Europe and the USA, we provide a reliable and efficient global supply structure.

Behind the scenes

Assembly

Each Podoblock product is assembled by hand with precision, using high-quality components produced by trusted manufacturing partners and perfected with our in-house expertise.

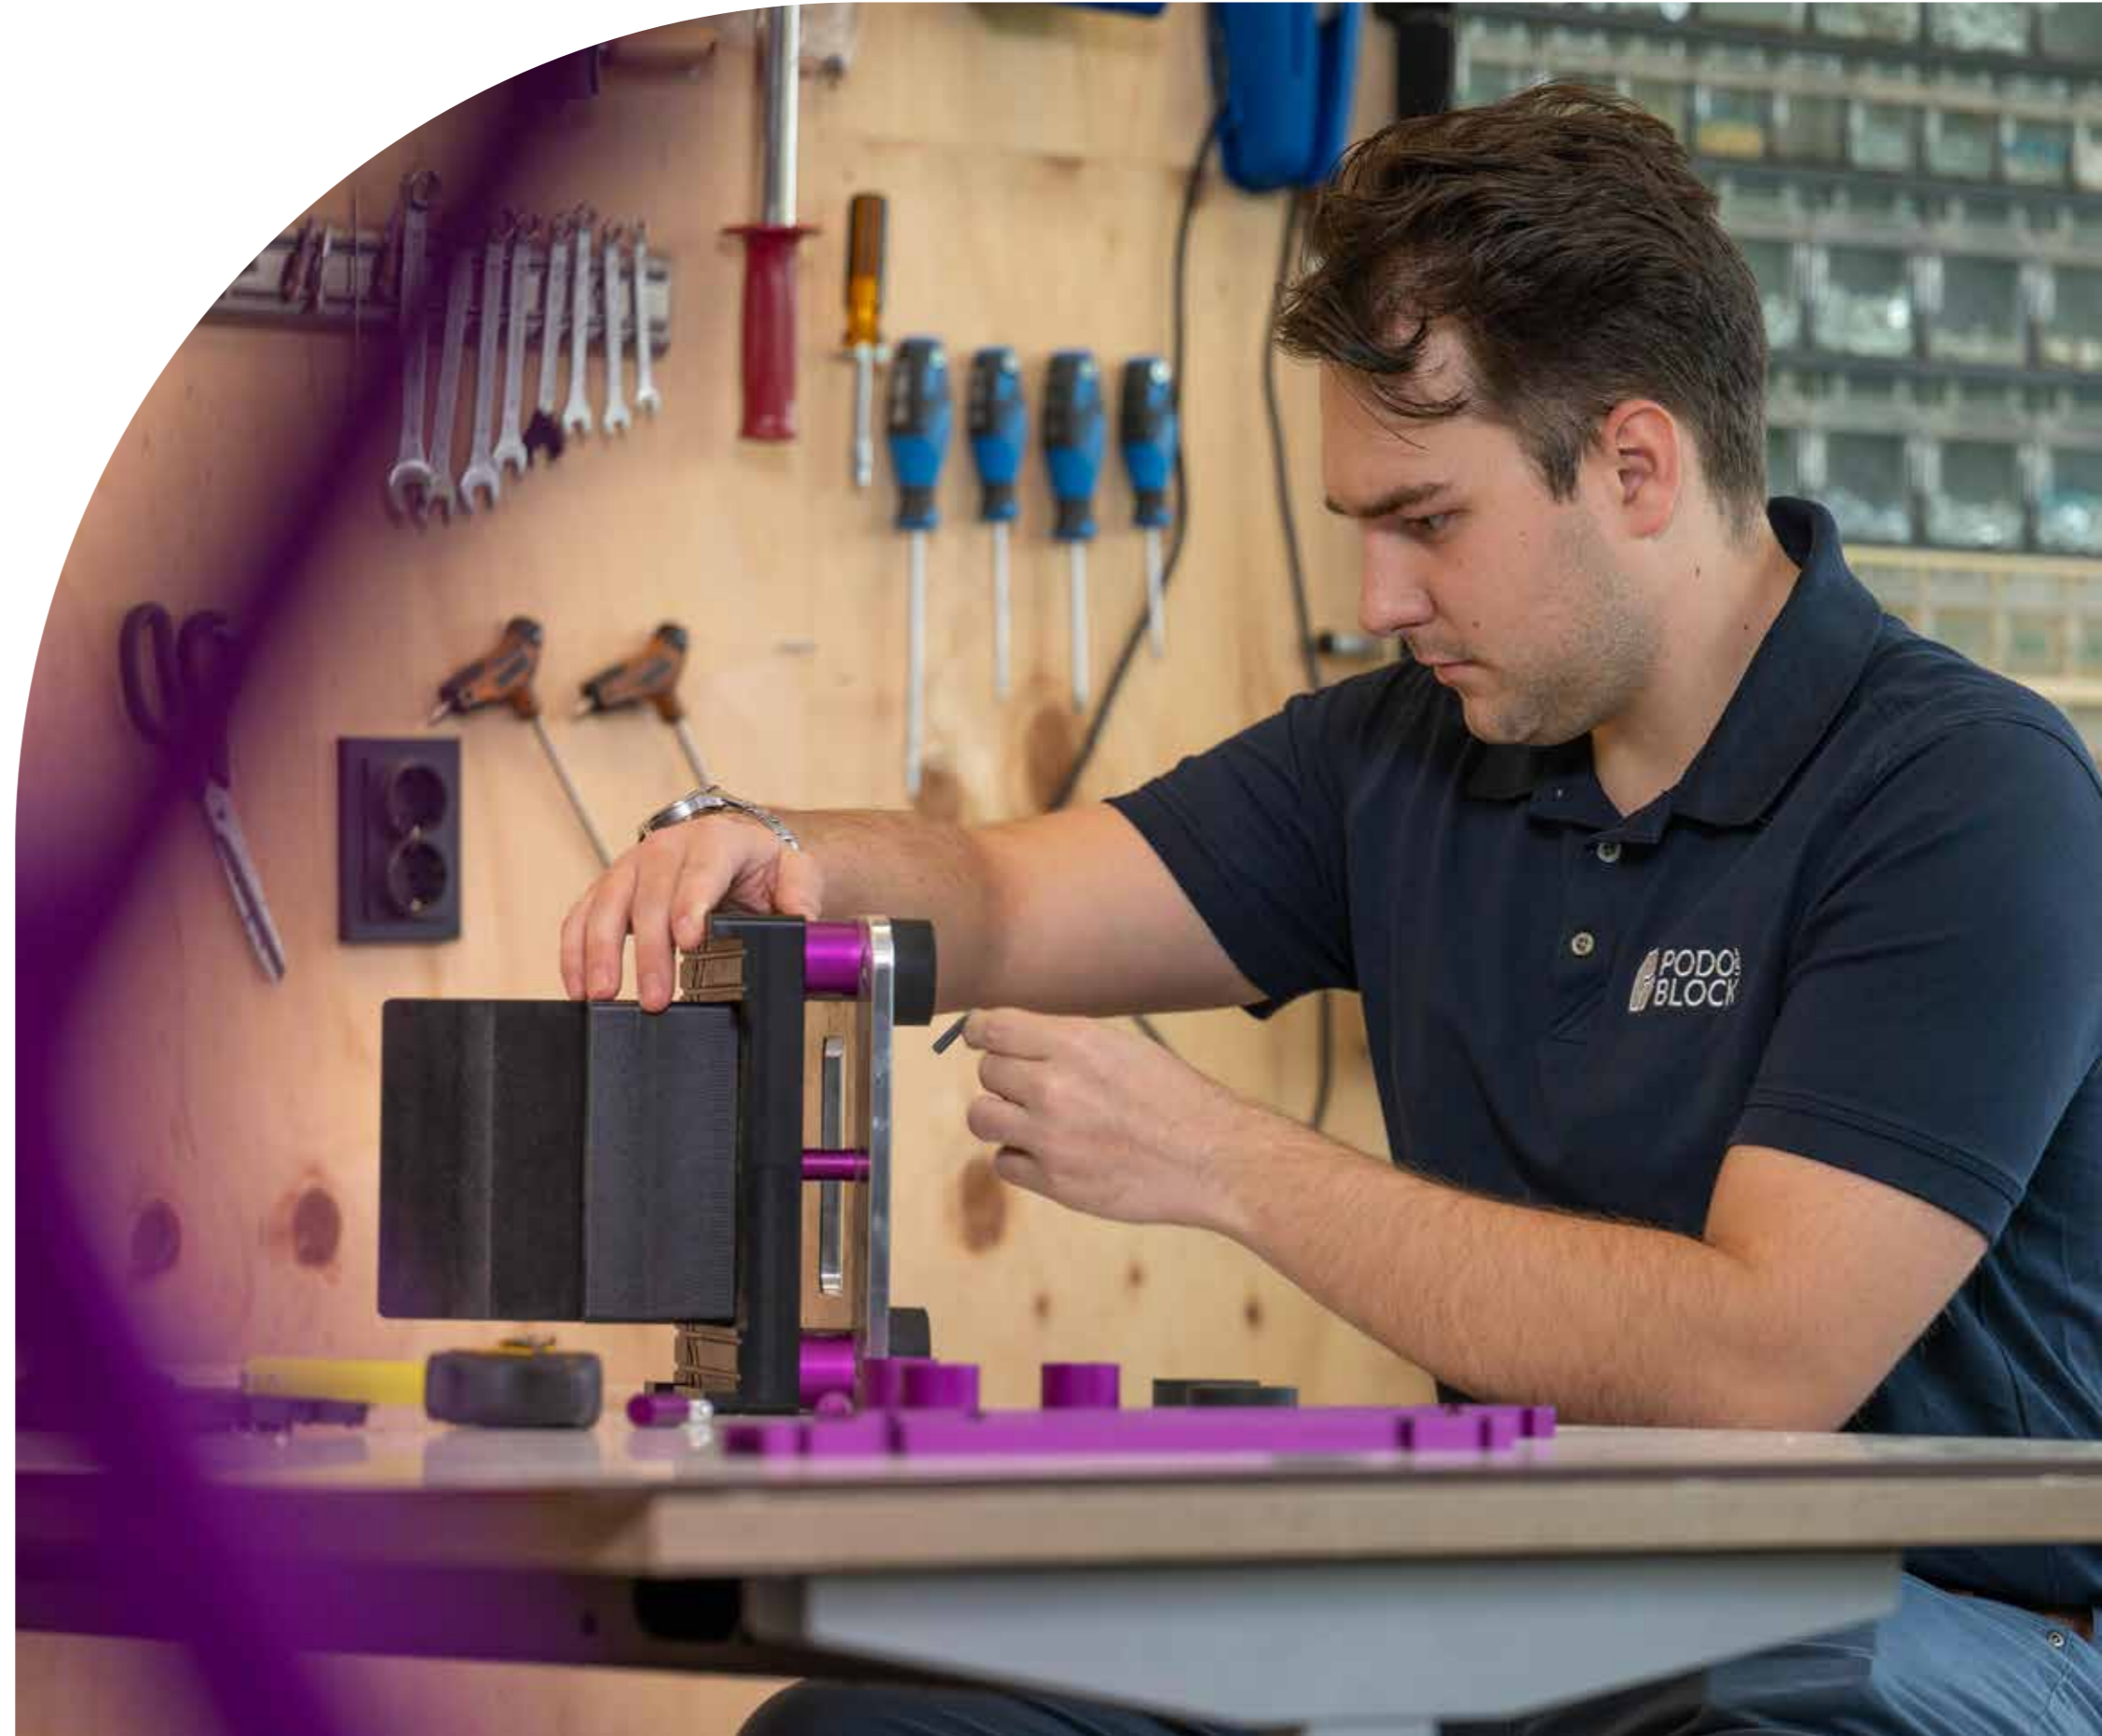

Maintenance

Regular maintenance extends the lifetime of your equipment. We offer scheduled checks or guidance for self-maintenance, especially for customers working overseas.

Repairs

Once you are used to working with Podoblock tools, you shouldn't have to work without them. Repairs always receive priority: we aim for same-day service whenever possible, and when that isn't an option, we try to arrange a loan unit to keep your work moving.

Did you know that Podoblock can support your workshops, wet labs and training courses by providing dedicated equipment on request? Contact us to explore the options.

Product Categories

Orthopaedics

Advanced orthopaedic tools developed to support equine veterinarians in achieving safe, consistent and repeatable imaging. Built for stability, accuracy and efficiency during demanding clinical and field examinations.

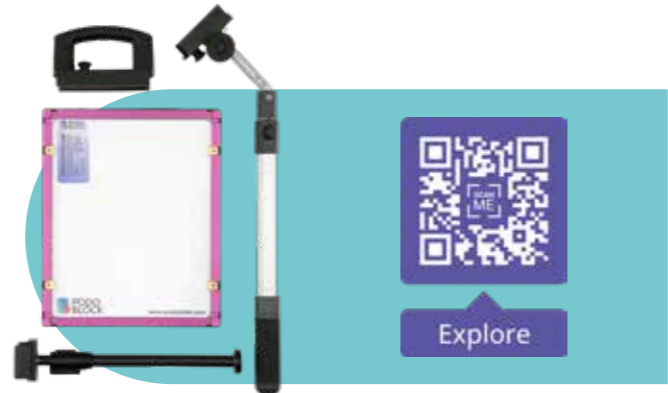

Generator solutions

Mobile generator solutions that improve workflow efficiency, ergonomics and safety. Built for fieldwork, ambulatory imaging and hospital environments.

Flat Panel Solutions

Durable, radiolucent protection for every panel size and brand. Engineered to extend lifespan, prevent damage and support daily use. Remote handling solutions enable accurate positioning while keeping professionals safely out of the X-ray beam.

Markers & Image Quality

Durable, radiolucent protection for every panel size and brand. Engineered to extend lifespan, prevent damage and support daily use. Remote handling solutions enable accurate positioning while keeping professionals safely out of the X-ray beam.

Dental

Durable, radiolucent protection for every panel size and brand. Engineered to extend lifespan, prevent damage and support daily use. Remote handling solutions enable accurate positioning while keeping professionals safely out of the X-ray beam.

Positioning

Smart positioning solutions that support accurate imaging across small-animal, equine and human workflows. Designed to improve ergonomics, patient handling and daily workflow efficiency in every clinical environment.

Protection & Safety

Protective apparel and shields designed for long-term comfort and radiation safety. Also available in custom colours, length and friendly designs for pediatric environments.

Transport & Examination

Smart, ergonomic solutions that support efficient workflows. From mobile transport systems and user-friendly carts to compact, ergonomic examination tables and our best-seller stool, the SCANdroid. Built to make daily work safer, easier and more ergonomic in every environment.

Why Podoblock?

- Makes work easier
- Excellent service
- Safe and ergonomic working
- Global delivery
- High-quality products
- Custom solutions
- Easy to transport
