Protection & Safety

Radiation protection

Radiation protection is a fundamental part of every X-ray examination. Imaging professionals are regularly exposed to radiation during daily procedures, making awareness and preventive measures essential in modern practice. As knowledge and regulations continue to evolve worldwide, protection solutions have become increasingly tailored to different working styles and individual preferences.

Personal protection

Podoblock offers a wide range of X-ray aprons and protective accessories that form the foundation of radiation safety. Our range includes aprons, thyroid shields, protective gloves and X-ray glasses, designed to reduce exposure while maintaining comfort and freedom of movement during daily imaging procedures. Available in various materials, sizes and colours.

Shields

In addition to personal protection, physical shielding offers an additional way to reduce radiation exposure. Podoblock shields are designed to minimise exposure to radiation and help create safer imaging environments during X-ray procedures.

Our shielding solutions support flexible positioning and integrate easily into both clinical and mobile workflows, allowing practitioners to maintain distance from the radiation beam whenever possible.

Storage & signs

Proper storage is essential to maintain the quality and longevity of protective equipment. Podoblock wall racks and storage systems keep aprons and shields correctly supported, helping prevent material damage and deformation over time.

Clear radiation warning signs contribute to awareness and safe working practices by clearly indicating controlled areas within clinics and mobile setups.

Scinti Solutions

These standard blocks are made to elevate the horse's foot to the desired height in 2 stages, single or stacked.

The blocks are made without any metal parts, in order to avoid interference with Scintigraphy and come with 3M anti-slip covers.

Get 2 sets of blocks (4 in total) on which to position the horse. Stacking the blocks allows for a second, higher position of the horse.

The 2 available Covers come in 2 different sizes.

- 1 block measures 75 mm in height
- 2 layered blocks measure 145 mm

The SET includes:

- 2 sets of 2 blocks
- 1 small Cover, measuring L 76 x W 28 cm and Pb 1,5 mm
- 1 large Cover, measuring L 76 x W 56 cm and Pb 1,5 mm

Both Covers each have 4 corner-grips for easier use and come in grey.
