

Flat Panel Solutions

SMART PROTECTION & HANDLING

Re-imagine the way you work

Flat Panel Solutions

Flat Panel Protection

Digital flat panels are valuable and sensitive devices. Podoblock flat panel covers protect detectors against impact during daily use, helping to extend the lifespan of your equipment in demanding equine environments.

Positioning

Stable and consistent positioning is essential for reliable image quality. Our flat panel protection covers and positioning tools support accurate placement while keeping the detector securely in position, reducing movement and the risk of retakes.

Remote handling

Radiation safety remains a key priority during X-ray imaging. By enabling hands-free positioning and increased distance between the practitioner and the generator, flat panel remote handling solutions help reduce radiation exposure. From the Distance Stick to the high-end Stat-X Bucky, these tools are designed to minimise exposure during daily imaging.

Compatible with over 50 brands

Designed for daily practice, Podoblock flat panel solutions are compatible with more than 50 detector brands. Each cover can be customised to fit individual panels, ensuring buttons, batteries and power connections remain easily accessible, while keeping workflows smooth and efficient.

Bucky Stands P11

DR-Quadro

The DR-Quadro is a handheld, lightweight, portable X-ray flat panel protection frame that secures and protects your device from outside influences. The rubber straps provide extra protection and a soft edge in case of impact. The DR-Quadro has a smart locking system that allows you to attach additional screen protection, grids or backscatter lead to your panel quick and easily. The DR-Quadro has an optional mountable telescopic grip, which rotates in two directions to get extra distance and a mountable and height adjustable Support foot.

FIND BRAND

Includes:

- Protection frame

Material:

- Anodized aluminium frame with rubber sides

Options:

- Handgrip - a mounted grip handle for easy carrying
- Distance stick
- Support foot
- Protection screen
- Carbon protection plate
- Backscatter lead
- Anti-scatter grid

Choose your handgrip

DR-Protectionbox

- Lightweight protectionbox - Handheld
- Depending on your DR-system, the box comes with a mounted grip handle or with our Greppstr 2.1 (see page 9).

DR-Podo-Protectionbox

Protectionbox with 5 mm adapters to place in our Podoblock and Combibox, that guarantees the same direction and angle with hoof examinations at all times. Depending on your DR system, the box comes with a mounted grip handle or with our Greppstr 2.1 (see page 9).

DR-Buckybox

The DR-Buckybox is an affordable alternative version of our X-ray cassette protection case, similar to our DR-Cowboybox.

The DR-Buckybox is ideally compatible with the Denfinity, Bucky Lite and Stat-X Bucky Stand.

- Available from stock for all current DR Flat Panels
- Perfect fitting box and secured with locking door
- The Polycarbonate box comes with the Greppstr 2.1 universal handgrip (for wireless Flat panels) for easy carrying

DR-Cowboybox

Protectionbox, Podo-protectionbox and remote cassette holder all-in-one.

Standard with mountable telescopic grip, which rotates in 3D positions to get extra distance and a mountable and height-adjustable 300 mm Support Foot. For enhanced distancing from the x-ray source and thus the radiation exposure, the DR-Cowboybox is ideally compatible with the Denfinity, Bucky Lite and Stat-X Bucky Stand.

Depending on your DR system, the box comes with a mounted grip handle or with our Greppstr 2.1.

DR-Cowboy Package

The optimal combined package of DR Products to make all X-rays needed, both safely and in a standardized manner.

The package deal includes:

- Podoblock
- DR-Cowboybox
- DR-Combibox LM / AP
- Combibox Dummy LM

Each product has its own QR code. Scan the code with your mobile's phone camera and always get up-to-date prices and information.

FIND BRAND

DR-Combibox LM / AP

The Skyline side of the DR-Combibox offers the same functionality as the DR-Skylinebox. Thanks to the unique angle, the horse stands comfortably while creating additional space for the X-ray generator.

When turned over, the DR-Combibox can also be used for LM and flat AP projections of the foot, without repositioning the hoof between examinations.

Special adapters allow hands-free X-rays in combination with the DR-Podo-Protectionbox, DR-Quadro, DR-Cowboybox or DR-Buckybox. This keeps the flat panel securely protected and consistently positioned during imaging.

FIND BRAND

Combibox Dummy LM

The DR-Combibox Dummy LM lifts the equine foot to a higher level.

The special adapter on the Dummy block allows you to take "hands-free" X-rays in combination with our DR Podo-Protectionbox, DR-Quadro, DR-Cowboybox or DR-Buckybox.

FIND BRAND

DR-Combibox Set

Keeping both standing feet on the same height is recommended with LM and AP examinations. That is why our Combibox Dummy can also be supplied with the DR-Combibox.

The Combibox Set is included:

- DR-Combibox LM / AP
- Combibox Dummy LM

FIND BRAND

DR-Skylinebox

This product is a full protection box made of polycarbonate material that withstands the weight of the horse's foot while in standing position during X-ray exams.

Because of the particular angle, the horse stands comfortably, and there is more space for the generator. The top surface comes with a translucent anti-slip surface. A lock secures the opening of the insert.

SCAN FOR PRICES

Grepstr 2.1

This universal grip handle can be used on a number of our DR-products:

- DR-Protectionbox
- DR-Podo-Protectionbox
- DR-Cowboybox
- DR-Buckybox

SCAN FOR PRICES

Distance Stick

These sticks can be used with several products for CR Cassette solutions and DR-Flat panel solutions.

SCAN FOR PRICES

Support Foot

This Support Foot can be used on several products for CR Cassette solutions and DR-Flat panel solutions.

They are universal and work with the CR-Distance Cassette holder with foot option, our DR-Cowboybox and DR-Buckybox.

CR Flat Panel Solutions

Computed radiography (CR) systems are still much in use in the veterinary world. At Podoblock we offer a complete product line in order to enable your CR system for your equine tasks. Check our complete CR product portfolio online →

SCAN ME

Stat-X Bucky

With our Stat-X Bucky, you have the most advanced, all-purpose mobile stand that will fully satisfy your needs in your daily working environment.

The Bucky can be ordered with optional short legs (50 cm instead of 90 cm) and extra counterweight (+6,5 kg).

For added usability and compatibility, there is a slide & lock adapter at the top of the Swingarms for connecting to the integrated 3D adjustable joint to our (optional) DR-Quadro, DR-Buckybox or DR-Cowboybox. It takes only 2 seconds!

The Stat-X Bucky is compatible with our DR-Quadro, DR-Cowboybox and the DR-Buckybox, but it comes without a Cassette or Panel holder, these can be ordered separately.

Bucky Lite

The Bucky Lite is a lightweight, collapsible mobile stand designed for mounting Podoblock X-ray cassette protection boxes, including the DR-Quadro, DR-Buckybox and DR-Cowboybox. Easily adjustable in height, it supports stable positioning for consistent X-ray results in daily practice.

Built from lightweight aluminium, the Bucky Lite is easy to fold and transport, making it ideal for mobile use. Setup is quick and intuitive: by pressing the slide bar on the vertical tube, the tripod wheels extend automatically into working position – no tools, loose parts or technical skills required.

A slide-and-lock adapter at the top allows fast connection to the integrated 3D adjustable joint and compatible DR boxes, enabling flexible and efficient positioning during imaging.

Head Stand with 3D joint

The Head Stand is a modular, mix-and-match system designed to support hands-free skull radiography. By combining different base elements with interchangeable head units, the system can be configured to suit a wide range of equine imaging situations.

The stable electrical and manual base elements provide secure positioning and precise height adjustment, supporting consistent, high-quality skull X-rays while allowing the operator to maintain a safe working distance.

In this configuration, the Head Stand is combined with the aluminium 3D joint, which can be used in combination with a DR-Quadro, DR-Buckybox or DR-Cowboybox. The 3D joint enables flexible and accurate positioning, while the DR box securely holds the cassette or flat panel during imaging.

Please visit our website to explore the additional head units and all available configuration options.
