

Transport & Storage

SMART MOBILE SOLUTIONS

Re-imagine the way you work

Transport & Storage

Mobility

Veterinary professionals work in dynamic environments where mobility and flexibility are essential. Podoblock transport and storage solutions support efficient movement of equipment between patients, stables, clinics and treatment areas.

Compact, lightweight and easy to handle.

Organisation & workflow

Efficient workflows begin with organised equipment. Our carts and storage solutions keep essential tools accessible and easy to manage during daily procedures.

By reducing setup time and improving accessibility, these solutions contribute to smoother workflows in both ambulatory and clinical practice.

Ergonomics

Long working days and repetitive procedures place physical demands on veterinary professionals. Ergonomic working positions reduce physical strain during daily work.

From mobile carts and stools to practical carrying solutions, our products help create more comfortable and efficient working environments.

Compact & practical

Space is limited in both vehicles and clinics. Podoblock solutions are designed to be easy to store, quick to transport and practical to use without compromising stability.

Developed for everyday veterinary practice, these solutions support efficient workflows.

Lowest position height 30 cm

Stageless height adjustment: 30 - 106 cm

SCAN FOR PRICES

SCANdroid

The SCANdroid is a height-adjustable scan stool designed for mobile veterinarians and clinical use. Stable and easy to manoeuvre, it features five castor wheels, two of which are lockable, ensuring stability during imaging procedures.

Extension pipes

The integrated gas spring enables smooth, stepless height adjustment. Optional extension pipes are available to increase working height and adapt the SCANdroid to different working conditions.

Cover Plate

The optional cover plate protects the bottom tray of the SCANdroid from dust and dirt. It can be customised with your own logo, adding both protection and a professional appearance.

FlexTray by Dr. Bakke

The FlexTray is a smart and flexible add-on designed for use with the SCANdroid stool or nearly any round or flat surface. It moves with you during procedures, keeping essential items within easy reach.

Ideal for holding a lightweight ultrasound scanner, laptop or sterile materials, the FlexTray supports efficient and ergonomic working. Adjustment is quick and intuitive thanks to the single locking lever, allowing easy one-hand adjustment.

SCANster

This veterinary trolley is the optimal ultrasound solution for creating the ideal working height at all times. Especially designed for portable ultrasound systems.

Optional

A ProbeRack can be ordered to store a total of 2 ultrasound probes and a gel bottle.

The Insert Tray makes it possible to create a clean work surface. It is removable and easy to clean.

Smooth & Efficient Transport

Optional: ProbeRack and Insert Tray

The DRagster

The DRagster veterinary cart features larger wheels for enhanced stability and a pull-out handle for transport, thus improving portability.

The cart is built from durable aluminium material, height-adjustable and suitable for heavy machines and equipment.

Three-position height adjustment, 25, 56 and 86 cm.

- It can be stored in a vertical position to save space
- Easy transport position with the pull-out handle
- Ideal as a mobile cart for small and larger equipment
- Also ideal for transporting your DR-flat panel suitcase

Optional

A professional ProbeRack for storing up to 2 ultrasound probes and a gel bottle.

The Insert Tray makes it possible to create a clean work surface. It is removable and easy to clean.

3 Mobile WorkStation StorageBox

The StorageBoxes are designed to securely stack onto each other with a Twist&Lock knob that creates a perfect, uniform and organised storage system - which can be placed directly onto your Mobile Workstation and transported easily in a veterinary car. In addition, stacking possibilities are unlimited and create maximum mobility and organisation in a stationary or mobile working environment.

- The boxes are designed to securely stack on top of each other with a Twist&Lock knob. The WorkStation's Base element also has a Twist&Lock knob for securing boxes. The stacking possibilities are virtually unlimited.
- You can stack up the StorageBoxes and Drawers to 68 cm high on the Mobile WorkStation. Need more boxes for your equipment? Extra boxes can be easily added. Another option is to take extra boxes to the mobile workplace on a Transport Base Element (page 15). For safe transportation, a Stationary Base Element is available which secures the StorageBoxes in the car (page 15).
